PRESSURE SEALERS

The PressureSeal Solution

PressureSeal is a labour efficient process whereby printed continuous or cut sheet forms, once personalised, can be folded and sealed in one single operation.

The overall objectives of the PressureSeal solution are to:

- *Create a fast, more cost-effective and direct route from computer to mailroom.*
- *Eliminate excessive handling - No impact printers, bursting or decollating.*
- *Maximise laser printing technology.*
- *Create multi-purpose generic documents for other applications.*
- *Provide total product security and confidentiality.*

Using PressureSeal the document is imaged, folded and sealed creating its own outgoing and if required a return envelope.

A Wide Range of Mail Applications

- Payslips & P60's • Cheques • Invoices & Statements
- Reminders • PIN Mailers • Appointment Notifications
- Return Mailers • Direct Mail - And many, many more...

The complete solution for Document Finishing
